## SUMMARY

Web Application Developer with 4+ years of experience in building dynamic, database-driven web applications using PHP, MySQL, JavaScript, and modern UI frameworks. Skilled in developing full-stack business systems including billing, inventory, reporting, authentication, and dashboards. Strong in debugging, performance optimization, and translating business requirements into scalable software solutions.

---

## WORK EXPERIENCE

**Web Application Developer, Cepheisys Solutions – Mumbai** **Feb 2022 - Present**

- Designed and developed full-stack web applications using PHP, MySQL, JavaScript, and Bootstrap.
- Built business modules such as Billing Systems, Inventory Management, Expense Tracking, and Dynamic Reporting.
- Implemented user authentication, session handling, and role-based access control.
- Created REST-style backend endpoints for AJAX-based frontends.
- Optimized SQL queries and improved application performance.
- Debugged and resolved complex production issues.
- Deployed and maintained applications on live servers.

---

## TECHNICAL SKILLS

### Languages & Web:

Bootstrap, Tailwind CSS, Responsive Web Design

### Frameworks & UI

PHP (Core PHP, OOP), JavaScript, jQuery, HTML5, CSS3, AJAX.

### Database & Backend

MySQL, Database Design & Optimization, CRUD Operations, REST-style APIs

### Tools & Platforms

Git, GitHub, VS Code, cPanel / Hosting, FPDF (PDF generation), Excel automation

### Concepts

Object-Oriented Programming (OOP), MVC Basics, Authentication & Sessions, Role-Based Access, Debugging & Troubleshooting

---

## PROJECTS

### Stock Billing System

**Tech:** PHP, MySQL, JavaScript, AJAX, Bootstrap, FPDF

- Developed a complete billing and inventory system
- Implemented barcode-based and non-barcode invoice generation.
- Automated PDF bill generation using FPDF.
- Built dynamic daily, monthly, and yearly reports.
- Managed purchase, sales, ledger, and account modules.

## **Favourite – Maritime Service Software**

**Tech:** PHP, MySQL, JavaScript

- Developed a service management system for maritime operations.
- Automated service time calculation and billing.
- Designed dashboards for tracking service records.

## **Stock Inventory System**

**Tech:** PHP, MySQL

- Built stock management system for purchases & sales.
- Implemented expense tracking module.
- Generated real-time inventory reports.

## **Dynamic Websites (Production)**

- Designed and deployed multiple client-facing dynamic websites with admin panels.
- Integrated enquiry forms, CMS-style management, and databases.

---

## **ACHIEVEMENTS**

- **Built 10+ production-level web applications used by real clients.**
- **Automated manual business processes using custom software.**
- **Reduced billing and reporting time by 60–70% through system automation.**
- **Independently handled full project lifecycle: requirements → development → deployment.**

---

## **EDUCATION**

**Bachelor of Commerce – 2022**  
**Siddharth College, Mumbai**

---

## **OBJECTIVE**

**Seeking a Web Application / Software Developer role where I can build scalable business systems and grow into a full-stack architect.**
